2022 toolkit

TMC Health's Vote For The Health Of It is a voter engagement campaign to encourage health care workers and the general public to vote for candidates who put the health of our community first.

The primary objectives of Vote For The Health Of It are to encourage individuals to register to vote (or update their voter registration), become informed about the candidates and where each stands on health care issues, and make a plan to vote, either by requesting an early ballot or at a voting center on Election Day.

TMC Health's campaign is focused on Pima and Cochise counties. This toolkit, however, can be modified to extend beyond Southern Arizona to engage voters throughout the state.

As a nonprofit organization, TMC Health cannot support or oppose any candidate for public office. This campaign and the corresponding resources found in this toolkit are aimed to educate and inform voters. Toolkit components include:

- Social media messaging and graphics
- Sample messages
- Candidate questionnaire guide
